## Mouse Anti-Human S100A7 Monoclonal Antibody Datasheet

Product Name: mAb anti-human S100A7 Clone No.: 3E7

Catalogue No.: MO-T40088K Quantity: 0.5 mg/vial

**Description:** Mouse monoclonal antibody to human

S100A7 (psoriasin).

**Purification:** Protein G affinity purified

**Product Type:** Primary antibody

Target Protein: Human S100A7 (psoriasin)

Immunogen: A short peptide (chkytrrddkiekps) derived

from human S100A7 (psoriasin) was conjugated with KLH for immunization.

Fusion Sp2/0-Ag14

Myeloma:

**Specificity:** This antibody is reactive to S100A7

peptide (chkytrrddkiekps).

**Species** Human, others not tested

Reactivity:

Host / Isotype: Mouse, IgG1 Kappa

**Formulation:** Lyophilized from a solution in 0.01M PBS,

pH 7.0

**Reconstitution:** Double distilled water is recommended to

adjust the final concentration to

1.00mg/mL.

Storage: Store at -20°C

**Research Area:** Oncology, psoriasis

**Background:** S100A7 is 11 kilo-dalton calcium binding

protein with 2 EF motifs. It is also called psoriasin due to its significantly elevated level in the skin lesion of psoriasis. The protein is over-expressed in squamous cell

tumors of the skin, lung and breast.

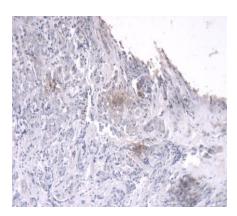

S100A7 expression is induced after activation of epidermal growth factor

receptor.

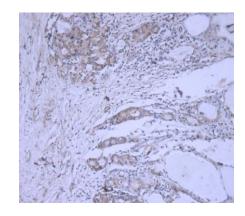

**Applications: IHC:** This antibody reacts with breast

cancer tissue and thyroid gland cancer section. The sections were treated by heat induced epitope retrieval before primary antibody ( $20\mu g/mL$ ) was added. The secondary antibody was an HRP-labelled

goat anti-mouse IgG antibody.

(Breast cancer section)

(Thyroid gland cancer section)
