Mouse Anti-Human NSE Monoclonal Antibody Datasheet

Product Name: mAb anti-human NSE

Clone No.: 171

Catalogue No.: MO-M40092C

Quantity: 0.5 mg/vial

Description: Mouse monoclonal antibody to human Neuron Specific Enolase (NSE)

Purification: Protein G affinity purified

Product Type: Primary antibody

Target Protein: Human NSE

Immunogen: Recombinant human NSE

Fusion Myeloma: Sp2/0-Ag14

Specificity: This monoclonal antibody reacts with recombinant human NSE.

Species Reactivity: Human, others not tested

Host / Isotype: Mouse, IgG1 Kappa

Formulation: Lyophilized from a solution in 0.01M PBS, pH 7.2

Reconstitution: Double distilled water is recommended to adjust the final concentration to 1.00mg/mL.

Storage: Store at -20°C

Research Area: Neurological study

Background: NSE (Neuron-Specific Enolase) is a glycolytic enzyme present in high concentration in neurons and in central and peripheral neuroendocrine cells. The protein showed specific neurotrophic and neuroprotective effects on cultured neuron cells in low oxygen condition and was found to increase expression after traumatic brain injury. Serum NSE level has been evaluated as a biomarker for predicting the outcome of patients after brain injury and for identifying brain injury in multiple organ trauma. Immuno-detection of NSE is used for identifying cells of neural and neuroendocrine lineage.

Applications: ELISA

References: If research is published using this product, please inform Anogen in order to cite the reference on this datasheet. Anogen will provide one unit of product in the same category as gratitude.

This product is for **LABORATORY RESEARCH USE** and further manufacture **ONLY**, and cannot be administrated to human and animals for use in diagnostic and therapeutic procedures.
